STÄUBLI ELECTRICAL CONNECTORS

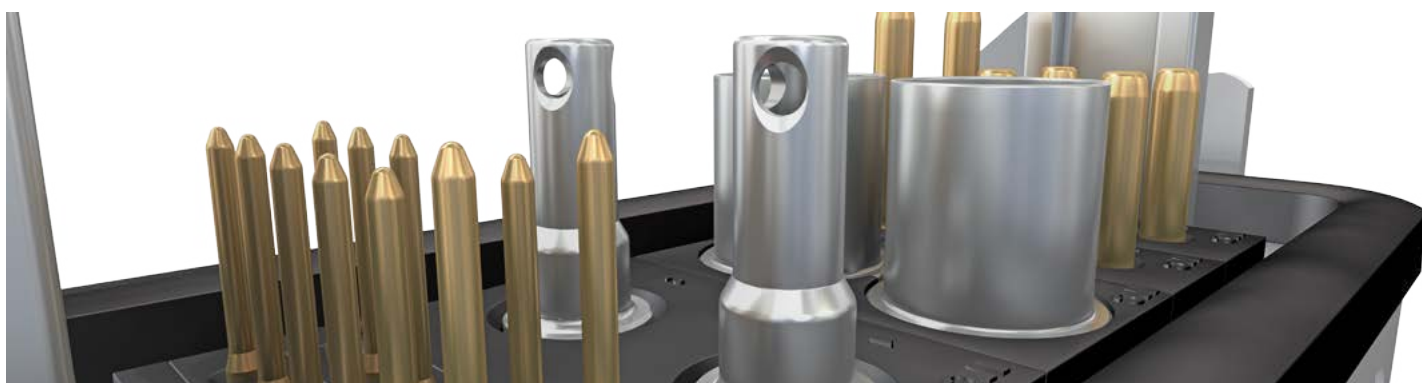

Long-term solutions – Expert connections

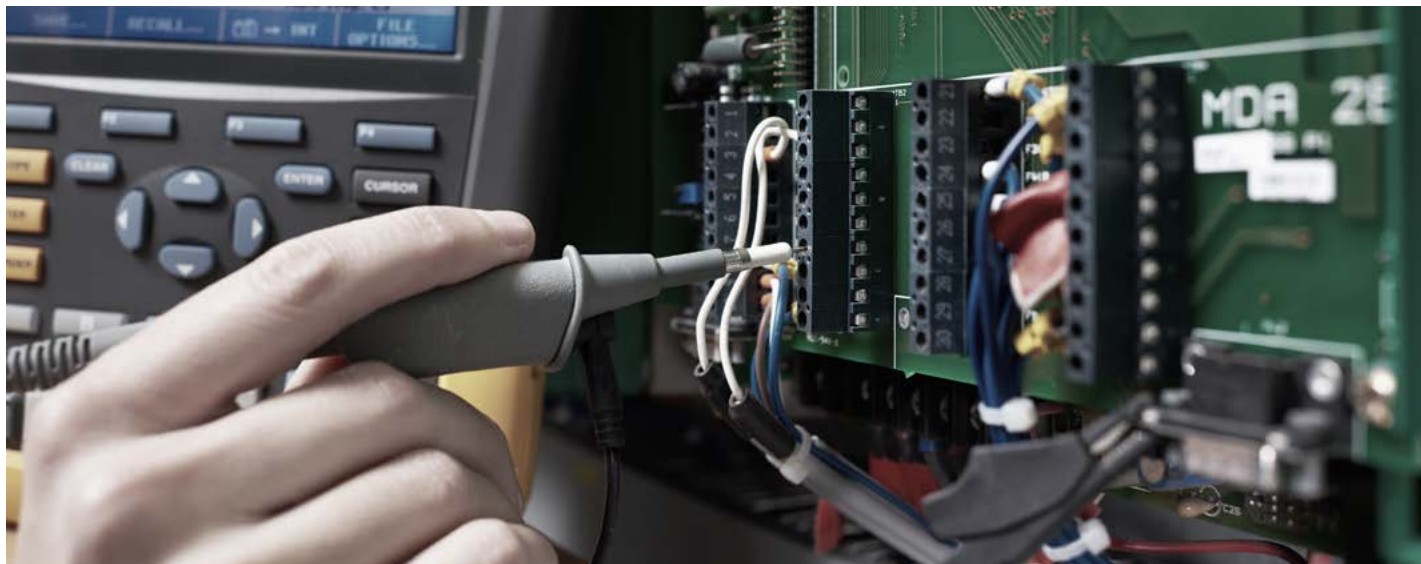

Stäubli Electrical Connectors is a leading international manufacturer of high-quality electrical connector systems. We are part of the Stäubli Group which offers mechatronics solutions for electrical connectors, liquid and gas couplings, robots and textile machinery.

Stäubli develops, produces, sells and maintains products for markets with high productivity standards. As recognized specialists, our focus is always on solutions and customers. Many new developments got their start here and have begun to make their way around the world.

Businesses and customers count on our commitment and our active support when dealing with unusual problems. With us, you are entering into a long-term partnership built on reliability, dynamism, and exceptional quality in both products and services.

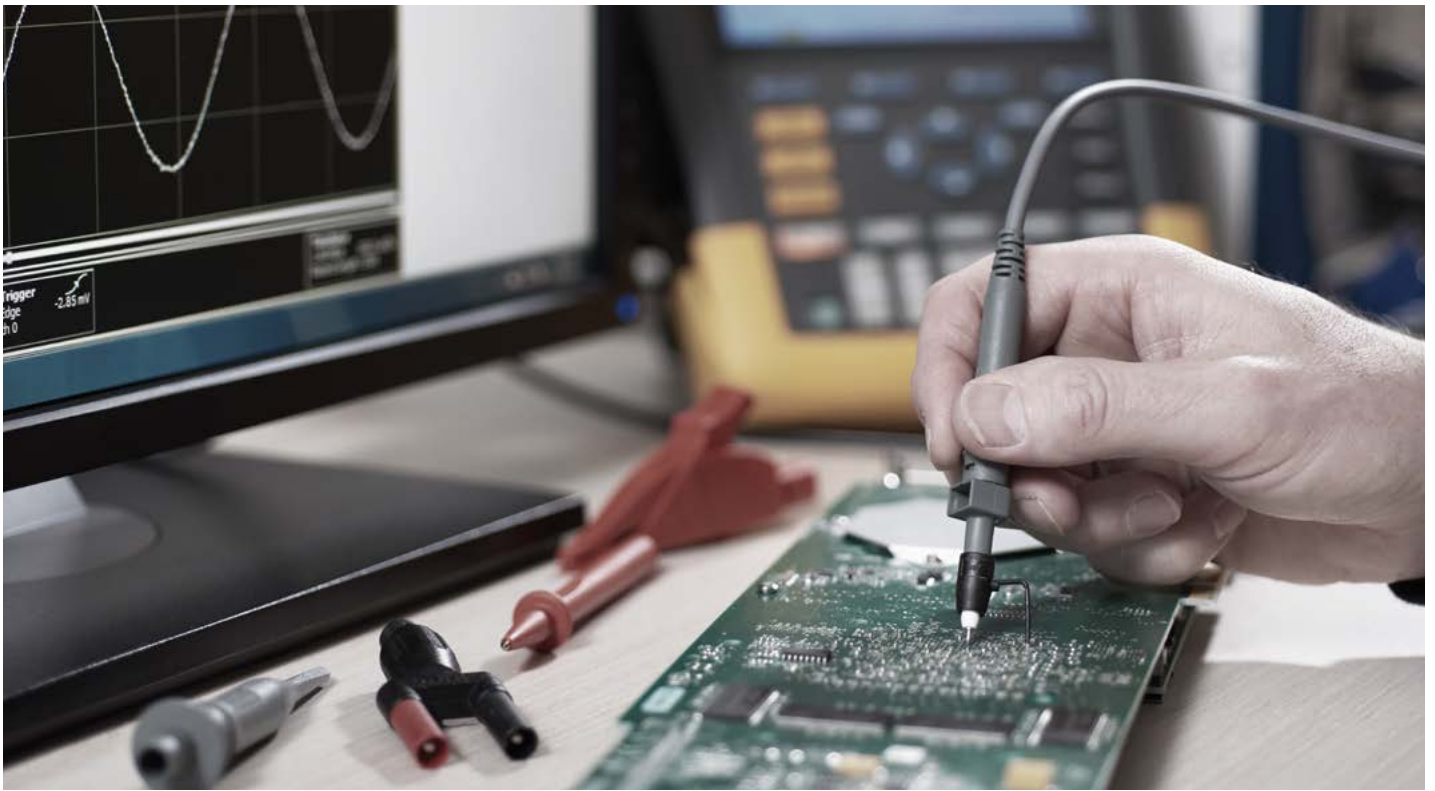

Applications and advantages

Stäubli test accessories are used in various measuring tasks. Stäubli offers accurately fitting accessories from extra-low to medium-high voltages, and from direct-current to high-frequency measurement technology. It can be found in electronics laboratories and training establishments, in service technologies and also in mains analysis/mains monitoring devices.

Thanks to the tried and tested MULTILAM Technology, Stäubli components guarantee longevity as well as reliability and meet the highest safety requirements. Our discerning clients rely on:

- A large range of standard and customized solutions
- Highest quality and safety standards
- Very low contact resistance
- High number of mating cycles

Individual solutions for every job.

Every measurement situation presents new challenges for you and your test and measurement accessories. Every sector, every area of application, and every live environment is different – yet despite this, the key parameters are always the same: safety, reliability, practicality, precision, and capacity of measurement accessories.

It pays here to have a partner who can provide a tailored solution for individual, application-specific requirements in every case. We put this solution together for you from our wide range of over 3000 high-quality

products, and also produce customer-specific products on request. This is where our wealth of experience in testing and measurement technology – gained over a period of more than 50 years – comes into play.

Panel-mount sockets

Test probes

Connectors

Crocodile clips

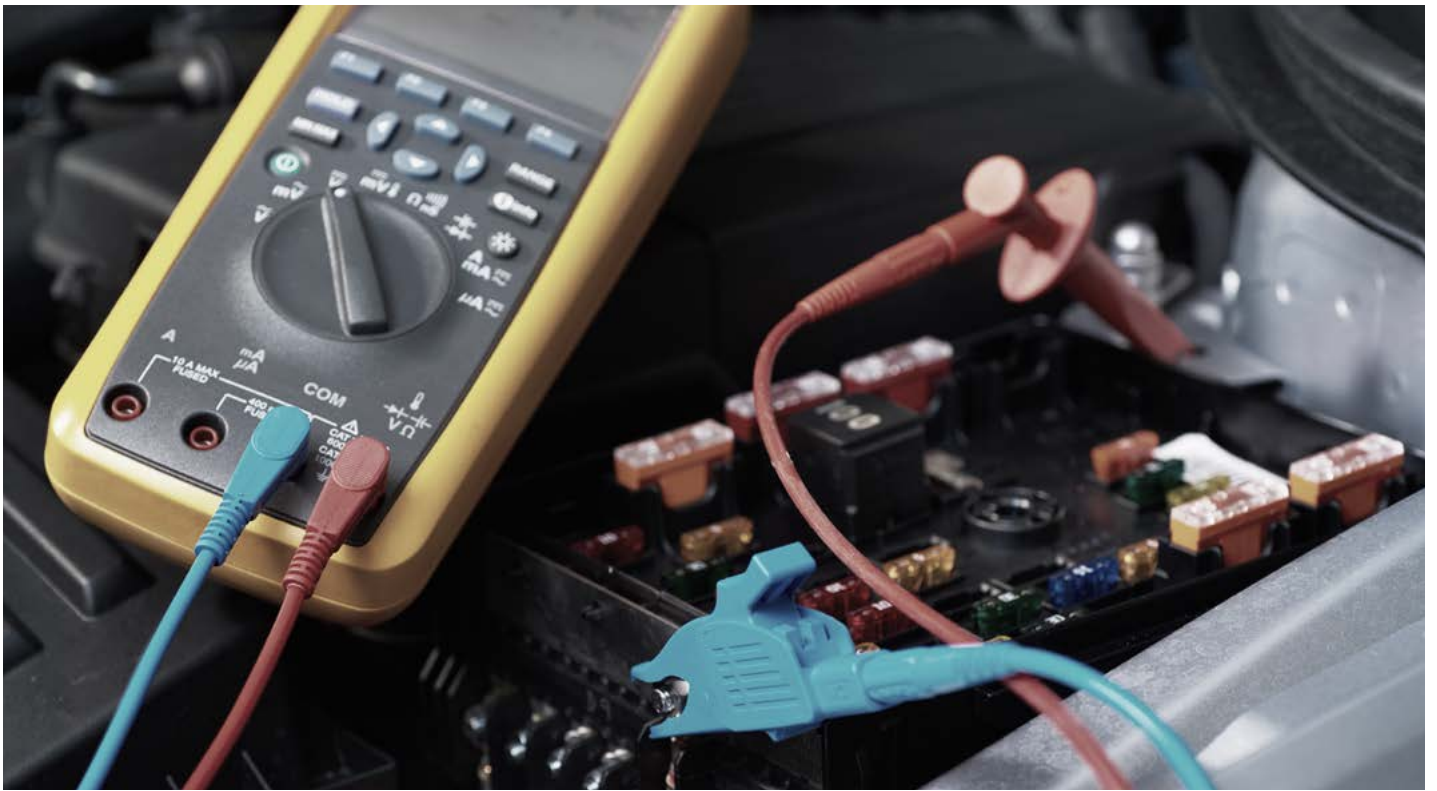

Test clips

Sockets for printed circuit boards

Economical solutions for every sector.

Thanks to our diverse operations and close collaboration with leading manufacturers of measurement equipment, we are familiar with all fields of application in electrical testing and measurement. This means we are able to provide the most efficient and sustainable solution for your area of application as well.

Our solutions are fully tailored to the requirements in your field of operation. The following sectors are just a few examples:

- Measurement equipment and accessories
- Power supply and distribution
- Building technology and installations
- Automotive engineering
- Mechanical engineering
- Schools and universities
- Research and development

The right solution for every market.

As a global market leader, we are represented in all major markets. Along with a strong presence in our home market of Europe, we have established ourselves in the North and South American and in the Asian markets,

and continue to expand our local branches and representatives on an ongoing basis. Our international operations not only mean that test and measurement accessories are adapted to the relevant technical conditions,

but also that you can always discuss specific requirements with a contact partner at a location near you.

The right solution for you.

Stäubli provides you with more than just test and measurement accessories.

We offer:

- Individual solutions for every sector and measuring range
- A wide product portfolio for all measurement categories up to CAT IV
- The highest quality and safety standards
- An international presence and a strong distribution network

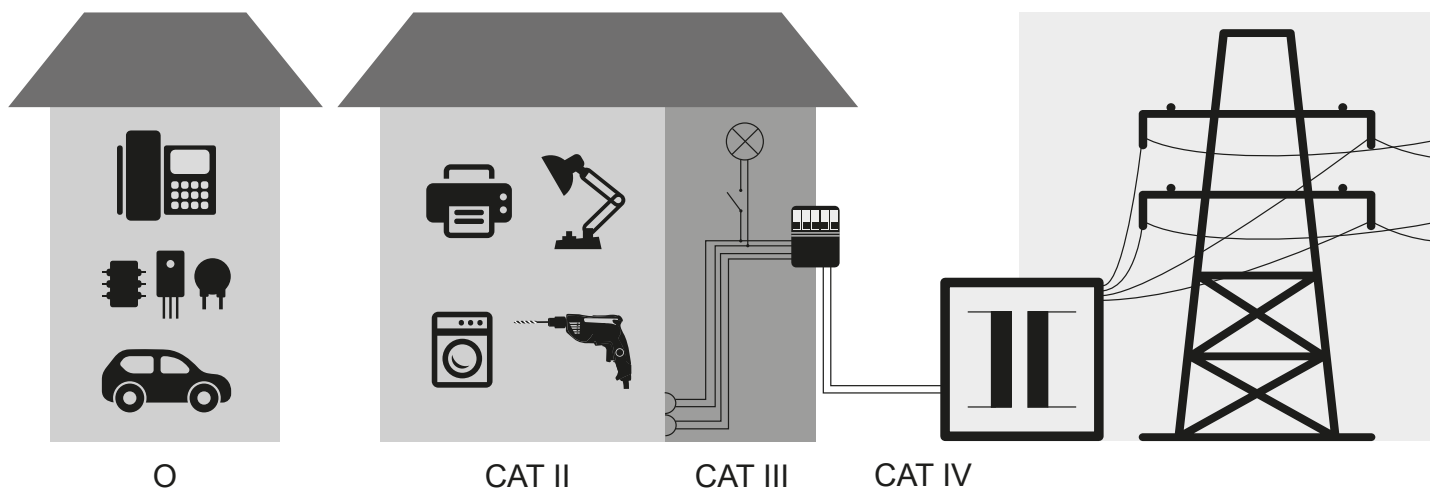

Safe solutions for every measurement category.

Our measurement accessories fulfill all current safety standards for measurement technology across all measurement categories: from low- to high-voltage systems; from MULTILAM plugs that are not

touch-protected to touch-protected dolphin clips; from test clips and adapters to cables and multi-strand wires.

Many of our products are particularly suited for use at high measuring voltages and high-

er frequencies. With our touch-protected clips for oscilloscopes and corresponding accessories, we also cover applications in the area of high-frequency measurement.
