

Corporate Identity

A company of tradition & vision

Multi-Contact AG was founded in Basel in 1962 by the Swiss electrical engineer Rudolf Neidecker (1911-1994). His invention, the Multilam Technology, is the foundation of our success.

Multi-Contact is a leading manufacturer of electrical connectors and contact systems, providing innovative solutions for demanding applications.

We develop, manufacture and distribute a broad range of high quality standard products and customized solutions with outstanding characteristics.

We aim for long-term success by continuous, profitable growth.

We use synergy effects as an independent company within the Stäubli Group, which we joined in 2002.

The satisfaction of our employees, customers and partners is of great importance to us.
