

# Sustainability

## We respect the environment and act ecologically

### Social conscience and environmental awareness

We are aware of the fact that maintaining a healthy balance between our economic interests and the needs of our natural and social environment is key to long-term success.

### Long-term perspective

In our strategic decisions, we mainly focus on long-term investments in human, technological and financial resources.

### Environmental management

We are committed to environmental protection and ecology.

We fully comply with the RoHS (Restriction of certain Hazardous Substances) standards for the reduction of environmental threats in the electronic industry.

Our measures taken to optimize the costs lead to lower material consumption, reduced energy consumption, and lower freight costs.

Multi-Contact is certified according to **DIN ISO 14001** in Switzerland and in Germany. The ecological aspect is an integral part of our management system, optimizing internal processes and organization accordingly.
